PROFILE

As a Senior Software Engineer and Team Lead with over 5 years of experience, I specialize in creating innovative and scalable solutions using React.js, React Native, and OutSystems. My career has been marked by a proven ability to lead cross-functional teams and manage complex projects from conception through delivery. With a deep understanding of front and backend technologies, I excel at driving project success, ensuring high-quality deliverables, and fostering a collaborative team environment. My hands-on leadership and technical expertise have consistently contributed to building efficient, user-centric applications and achieving business goals.

WORK EXPERIENCE

Team Lead

Metafic, Indore

Sep 2021-Present

I lead the development and implementation of cutting-edge web applications, ensuring seamless user experiences and high-performance solutions. Collaborating with cross-functional teams, I drive innovation, maintain code quality, and contribute to the success of client projects.

Senior software engineer

VSNSTech, Pune

June 2021-Sep 2021

Senior Software Engineer at VSNSTECH, specializing in React.js technology. I lead the architecture and development of high-quality web applications, driving innovation and ensuring code integrity. My role is pivotal in delivering successful client projects, where I consistently contribute to the strategic execution and technical excellence that define our team's success.

Associate Consultant

Invincix Solutions, Bhubaneswar

Sep 2020-May 2021

As a front-end developer, I've gained extensive experience working on diverse projects, including Affihub (Sharetribe marketplace template), Serity, and Lobox, utilizing ReactJS. My role encompassed high-level design, managing technical architectures, and implementing complex application features. Additionally, I've contributed as a backend developer on projects like Instablood (a live Android app), using NodeJS. In this capacity, I successfully optimized existing software by resolving errors, enhancing user interfaces, and improving overall performance.

Software Developer

InnoverenIT Services, Bhubaneswar

June 2019-Sep 2020

As a frontend developer, I've had the opportunity to work on notable projects like Medist CRM and Korero CRM, utilizing a robust tech stack including ReactJS, Redux, React Router, and Moment. In these roles, I played a pivotal role in high-level design, managing technical architectures, and implementing complex application features. My contributions were particularly impactful in UI development, where I ensured a seamless and intuitive user experience in web applications.

WORK EXPERIENCE

Intern

Jan 2019 - April 2019

Appstone, Bhubaneswar

Collaborated within a cross-functional team of 5 interns, including software engineers and a program manager, to develop an online music system application using ReactJS and NodeJS. Led efforts to define the design and user experience, ensuring the delivery of a delightful and efficient application. Demonstrated effective collaboration with design teams to ensure seamless integration of software solutions.

PROJECTS

21kschool

Led the development of 21k Schools, a Learning Management System (LMS) built on React, facilitating seamless onboarding for schools and content upload functionality. Contributed as a Frontend Developer, crafting numerous reusable components to optimize development efficiency.

Korero CRM

Led the development of Korero CRM, a robust sales management tool built with React, Redux, and LeafletJS. This platform empowers sales teams by providing critical insights into opportunity tracking and project management. As a Frontend Developer, I crafted reusable components and integrated reminders and tasks, ensuring seamless user experiences and efficient project delivery. Korero CRM captures key data like sales amounts and closing dates, driving informed decision-making and boosting sales success.

InstaBlood

Instablood is a user-friendly Android app designed to provide timely and critical information about blood availability in local areas. With its intuitive interface, users can effortlessly access details of available blood donors and connect with them directly. The app also facilitates seamless communication between those in need of blood and potential donors, ensuring swift and efficient assistance during critical situations. By bridging the gap between donors and recipients, Instablood empowers communities and saves lives through real-time connections.

WeKare

Led the development of WEKARE, a groundbreaking health app that simplifies daily data logging for therapy, medication, diet, vitals, and notes. Built with a focus on user experience, WEKARE automates care routines with timely reminders and alerts, fostering adherence to treatment plans. The app integrates community features for shared experiences and supports virtual connectivity with care providers, bridging the gap between patients and healthcare professionals. WEKARE revolutionizes healthcare management, empowering users to enhance their well-being through technology.
